Re: Repeal of CCB Regulation 12.065

Dear Chairman Douglas,

Clark Natural Medicinal Solutions submits this letter in support of the repeal of regulation 12.065.

The labeling requirement in regulation 12.065 is unnecessary and it creates an undue hardship on cultivators. Treating cannabis with ionizing radiation is safe as it helps prevent mold and aspergillus from developing post-testing. This serves as a benefit to the consumer and has been used through out the world and this treatment is actually a requirement of all exported/imported produce.

Radiation has a spectrum from basic light bulbs to Computed Topography and hence the language is not clear to its clear application.

Our company supports repealing regulation 12.065 because the “NOTICE” (warning) language is not scientifically supported and thereby misleading to consumers.

Thank you for your consideration of this matter. Clark Natural Medicinal Solutions urges the CCB to repeal regulation 12.065.

Sincerely yours,

Dr. Pejman Bady  
President CEO  
Clark Natural Medicinal Solutions
