Subject: RADURA SYMBOLD - DO NOT REMOVE

Dear CCB Board members,

Welcome to the Cannabis Industry!

Can you please tell the Nevada citizens why we are allowing lessor restrictions with radiation treatments and the RADURA symbol? This is a human consumable product. Patients and Adult users (consumers) with compromised immune systems must be informed before consumption.

Mostly importantly, I am confused...so instead of requiring and paying for growers with skillsets, instead of investing in the correct grow environments, and instead of ensuring safe and clean genetics, we are considering lowering the standards to PASS more contaminated and FAILED material in Nevada.

I am against the symbol being removed from consumer packaging! Nevada must make the cultivation staff disclose their methods per regulations.

Thank you,
Carina Robinson
