

JUSTICE  
COMMERCE  
COMMUNITY

My name is Tina Ulman, I am one of the founders and current President of The Chamber of Cannabis an organization founded by industry professionals who want to see justice restored, particularly when it pertains to the failed war on drugs and we want Nevada to lead the way for fair and equitable commerce opportunities.

We absolutely recognize our privilege to be working in an industry people are still serving life sentences in prison for, and we recognize our opportunity to help build one of the best cannabis markets in the world.

We want to publicly commend the CCB for completing the demographics and consumption lounge study. Both are items that needed to be focused on and addressed this year.

It is clear to see from the data that owners and board members are predominantly made up of white males while many of the associates and consultants represent a much wider range of demographics proving how diverse the talent pool in the cannabis space actually is.

Today we are asking the CCB to find solutions to this concern and the concern of not having a legal place for residents and tourists to consume cannabis by creating a more fair and equitable license process for both social use venues and additional cultivations and productions that are needed to serve the market.

Nevada has the opportunity to lead the way in best practices and cannabis regulation.. We appreciate you listening to the leaders that are shaping the industry with the utmost integrity and passion. The Chamber has many qualified and underrepresented individuals who want to be a resource to the CCB and an ally to those who want to see it regulated fairly and well.
