(a) Evaluate the testing laboratory facility's performance and perform corrective action for any unsatisfactory results received. Failure to provide a result for a required analyte shall be considered an unacceptable result.

(b) Investigate any unsatisfactory results, to include a retrospective review of potentially affected cannabis samples whenever applicable.

(c) Document investigation findings and any resultant corrective actions, if applicable, and maintain the documentation for a period of at least five ~~two~~ years.

11.050 Required quality assurance tests; submission of wet cannabis for testing.

3. A sample of usable cannabis must be at least 10 grams. A sample of a production run must be the lesser of 1 percent of the total product weight of the production run or 25 units of product, but not less than 5 grams of the production run. Before testing, a All samples must be homogenized by the testing laboratory facility before testing using a homogenization process which has been approved by the appropriate Board Agent and in a manner that prevents contamination of test samples or analytical portions.

11.070 Testing: Selection of representative samples and random samples; segregation period for entire lot; duties of testing facility; disposal of lot if sample fails test; release of lot if sample passes test; filing of electronic copy of certificate of analysis for tests performed by testing laboratory facility; grounds for disciplinary action for failure to comply.

1. Immediately before packaging:

(a) Usable cannabis for sale to a cannabis sales facility, cannabis production ion manufacturing facility or another cannabis cultivation facility, a cannabis cultivation facility shall segregate all harvested cannabis into homogenized lots of flower and trim, respectively, and allow a cannabis independent testing laboratory facility to select a homogenous representative sample for testing from each lot the cannabis cultivation facility has segregated. The cannabis testing laboratory facility which performs the test must collect the samples. If the cannabis cultivation facility has segregated the lot of harvested cannabis into packages or container sizes smaller than the entire lot, the cannabis cultivation facility must present all packages comprising the lot to the cannabis independent testing laboratory, and the cannabis testing laboratory facility must sample and test each package containing harvested cannabis from the lot.

11.075 Testing: Authorized use of cannabis upon failure of microbial screening; automatic failure to pass; request for retest; retest for pesticide residue must be performed

by State Department of Agriculture; effect of passing or failing retest.

1. Upon approval of the appropriate Board Agent, a lot or production run of cannabis that fails a residual solvents, pH, water activity (aw), homogeneity, or microbial screening test may be **remediated or** used to make an extract. After processing, the **remediated lot or** extract must pass all required quality assurance tests.

4. A cannabis cultivation facility or a cannabis product **ion manufacturing** facility may not request a retest pursuant to this section **if the lot or production run has undergone any type of remediation since** ~~unless, at the time samples were~~ **are** initially taken for testing. ~~three~~ **two** samples ~~are collected at the same time by a cannabis independent testing laboratory facility using tamper-resistant bags. One of the samples must be taken by the cannabis independent testing laboratory facility for testing and the facility must place the other samples in a secure quarantine storage area at the facility for further retesting by a secondary and/or third cannabis independent testing laboratory facility or the State Department of Agriculture.~~

7. Except as otherwise provided in this subsection, a cannabis cultivation facility or a cannabis product **ion manufacturing** facility may submit a request for retesting of not more than 50 lots or production runs each calendar year. For any subsequent failure of a quality assurance test in a calendar year, the facility shall **request permission from the Board for an additional 50 tests,** destroy the lot or the entire production run, **or request to send the lot or production run to extraction or remediation as applicable.** **The Board may extend authority to the Executive Director of the CCB to approve such requests. If the additional 50 retests are approved, a cannabis cultivation facility or a cannabis production facility must obtain the results of two retests in the category which failed, from two different cannabis independent testing laboratories. For the retested lot or production run to be approved for sale, both retests must provide passing results. If both retests provide passing results, the certificate of analysis with the higher quantifiable results will be recorded. If it is not clear which certificate has higher results, the appropriate board agent will select the one to be recorded. No more than one such request for additional tests is permitted within a calendar year.** A lot which only fails a quality assurance test for moisture content must not be counted for the purpose of this subsection.

a. To request permission from the Board for an additional 50 tests, a cannabis cultivation facility or a cannabis production facility must file a petition with the Board which must include the following:

- (1) Request for the additional 50 tests;*
- (2) List the prior 50 lots or production runs that failed, what they failed for, and which cannabis independent testing laboratory performed the test; and*
- (3) List whether the prior 50 lots or production runs passed pursuant to a retest, and which cannabis independent testing laboratories performed the retests.*
