

For the record Dan Steele,

CCB:

I just wanted to point out, prior to "legalization" I completed Nevada Drug Court for possession of 28 Grams + of marijuana.

As someone who wants a license in this industry, It appears that completing drug court was actually the wrong thing for me to do. Without looking into it, I would qualify for a social equity consumption lounge had I not graduated from Drug Court. In hindsight, I shouldn't have done drug court. Is that what you want to reward?

Anyways, I would like a consumption lounge with vertical integration from my medical card plant count. I feel like my exclusion from industry participation is targeted and calculated.

I think Nevada is a beautiful place. Home means Nevada to me. Yet I find myself actively seeking employment out of Nevada because of industry exclusion. I'd like to live in Nevada.
