Following the Legislative Commission's September 24, 2026 objection to R152-24A concerning the sample-size amendment in Section 69(3), the Board will consider removing the amendment in Section 69(3) that would increase the minimum sample of usable cannabis from 10 grams to 20 grams. Removing this amendment would retain the existing 10-gram language in Section 69(3). The Board may also affirm its prior adoption of the remaining, unchanged provisions of R152-24A and approve resubmission of R152-24, as revised, as a single regulation for review by the Legislative Commission. The full text of R152-24 to be considered is available on the Board's website. (for possible action)

XIV. Notice of Intent to Act Upon a Regulation as contained in LCB File No. R103-26.

The Board will consider possible action to adopt, amend, and/or repeal the proposed regulation affecting multiple regulatory provisions, including hold orders, substantial hazards to the public health, disclosure of confidential information, and disciplinary proceedings before hearing officers, including changes enacted by Assembly Bill No. 75 of the 2025 Legislative Session. The proposed regulation also updates, clarifies, and reorganizes existing requirements governing cannabis establishment licensing and operations. Please note that, where the proposed regulation amends sections also amended by R152-24, it incorporates R152-24's changes to those sections to preserve them and avoid inadvertently overwriting them while R152-24 is not yet in effect. The full text for R103-26P is available on the Board's website. (for possible action)

- a. Public Comment on Agenda Item XIV.

XV. Notice of Intent to Act Upon a Regulation as contained in LCB File No. R104-26.

The Board will consider possible action to adopt and/or amend the proposed regulation to implement Senate Bill No. 157 of the 2025 Legislative Session, codified primarily at NRS 678B.649. The proposed regulation revises the definition of "lot" to conform to NRS 678B.649(3)(b) and aligns representative sampling standards with ASTM D8334/D8334M as required by NRS 678B.649(2)(b). To align with those standards, the proposed regulation increases and allocates the amount of usable cannabis collected for testing, retesting, and retention while meeting the minimum sample weight requirements in NRS 678B.649(2)(c) and establishes sampling and documentation requirements for cannabis cultivation facilities. It also establishes procedures for returning or disposing of the retesting and retention portions of a sample. To preserve changes in R152-24 that are not yet in effect and avoid inadvertently overwriting them, the proposed regulation also incorporates provisions from R152-24 that revise quality-assurance testing requirements for cannabis destined for extraction; revise requirements governing certificates of analysis; and otherwise clarify and standardize the collection, handling, testing, and documentation of cannabis samples. The full text for R104-26P is posted and available on the Board's website. (for possible action)
